

Subtracting integers worksheet grade 7

Continue

The adding and subtracting integers worksheets for grade 7 helps students to understand the procedure of adding and subtracting integers. The concept of adding and subtracting integers will follow the student through each grade in their journey through math in higher grades. In these worksheets a student will go through the concepts such as the modeling addition or subtraction on the number line, finding the sum of integers by reasoning, and the use of integers to model real life questions. These seventh grade adding and subtracting integers worksheets contain questions related to the following topics: Modeling addition or subtraction on number lines: A number line is a visual representation of numbers on a straight line. All real numbers can be represented on a number line. The adding and subtracting integers worksheets for grade 7 contain questions in which adding and subtracting integers are represented on a number line. Finding the sum of integers by reasoning: There are a few techniques when applied by a student to help in finding the sum of two integers with the same sign or when they have opposite signs. Finding the difference of integers by reasoning: The use of subtraction techniques to find the difference of integers improves a student's problem solving skills and prepares for complex subtraction problems in higher grades. Sum of integers and their opposites: Two numbers that are the same distance from 0 on a number line, but on the opposite sides of 0, are called opposites. The sum of an integer and its opposite is always 0. The worksheets also contain questions related to opposites. Applying adding and subtracting integers to model real life problems: The online free adding and subtracting integers worksheets for grade 7 contain context based questions where integers are used to represent quantities and with operations that need to be applied to find the solution of problems. If you feel the need to refresh your understanding about adding and subtracting integers as a concept, click on the following links: Benefits of 7th Grade adding and subtracting integers Worksheets: Integers worksheets (Easy): These seventh grade adding and subtracting integers worksheets help the student to recall the various terms and operations related to integers. The free printable worksheets allure the student to learn concepts and apply them in the classroom. Integers worksheets (Medium): Printable and online adding and subtracting integers worksheets for grade 7 allow the student to use different integer operations to solve various difficulties. Additionally, it improves the student's capacity to quickly work through integer addition and subtraction problems. These worksheets also aid in enhancing a student's aptitude. Integers worksheets (Hard): The free worksheets for seventh grade available online and in a printable format explain specific types of issues whose solutions require two or more steps to complete, suggesting that more than two operations (addition and subtraction) on integers may be necessary to solve the problem. This equips students to develop solutions to more complex challenges. These worksheets also assist students in developing their problem-solving abilities for upcoming grades. Printable PDFs & Online 7th Grade Worksheets: Free printable adding and subtracting integers worksheets for 7th grade act as an excellent resource to boost skills related to solving problems on adding and subtracting integers, and to prepare students for school tests and other aptitude exams. The 7th grade adding and subtracting integers worksheets assist the student in developing a comprehensive grasp of the application of adding and subtracting integers. Attempting challenging questions that appear in higher grades is an added advantage. The adding and subtracting integers worksheets for grade 7 covers basic applications, such as representation of operations on the number line, finding opposites, reading methods to find sums or difference and using integers to model real life problems. Timed online worksheets also help the student to enhance time management skills, especially while solving particular types of questions. With these timed worksheets the student can also compare scores and time spent on the worksheets with classmates and challenge them as well. In this absolute value worksheet, your student will add equations with variables. Question 1. Fill in the blanks: a. Integers contain whole numbers and _____ numbers. b. The greatest negative integer is _____. c. The successor of -99 is _____. d. 0 is greater than every _____ integer. e. The sign of the product of 8 negative integers and one positive integer is _____. f. $-7 \times 29 \times 0 \times (-8) =$ _____. g. $(-13) +$ _____ $= (-13)$ h. _____ $+ (-15) =$ 0 i. _____ $\times 1 = 129$ j. $-8/2 =$ _____. k. For all integers a, $a +$ _____ $= a$ and $a + (-1) =$ _____. l. When the dividend and divisor are of opposite sign, the quotient has a _____ sign. m. On number line, when we add a positive integer or subtract a negative integer, we move to the _____. n. We move to the _____ on a number line if we add a negative integer or subtract a positive integer. o. _____ is not commutative for integers. p. $(-10) \times (+9) + (-10) =$ _____. Question 2. State True and False i. The product of three negative integers is a negative integer. ii. The product of a negative and positive integer may be zero. iii. The smallest positive integer is 1. iv. The identity element for addition in integers is 1. v. The additive inverse of zero is the number itself. vi. $(-1)^{103} + (-1)^{104} = 0$ vii. The sum of two negative integers is less than either of the addends. viii. Multiplication is not commutative for integers ix. $a - b = b - a$ x. $-3 \times 3 = -12 - (-3)$ Question 3. One autumn morning the temperature went up from -4°C to 5°C a. By how many degrees did the temperature rise? b. During the afternoon the temperature then fell by seven degrees from 5°C . What was the temperature at the end of afternoon? Question 4 Height of a place A is 1800 m above sea level. Another place B is 700 m below sea level. What is the difference between the levels of these two places? Question 5. If $p * q$ means $p \times q + 1$ and $p \# q$ means $-p + q - 2$, then find the value of the following: (i) $-4 * 3$ (ii) $(-3) * (-2)$ (iii) $(-7) \# (-3)$ (iv) $2 \# (-4)$ (v) $7 * (-5)$ (vi) $(-7 * 2) \# 3$ Question 6. Carry out the following addition and subtraction of integers a. $(-11) + (12) - (-10)$ b. $-1 - [-1 - (-2)]$ c. $(-4) - (-8) - (-10)$ d. $-18 - (+10)$ e. $(-99) - (+1)$ f. $999 - (-1)$ 1 a. Negative b. -1 c. -98 d. negative e. positive f. 0 g. 0 h. 0 i. 129 j. -4 k. 1 and -1 l. negative m. right n. left o. subtraction or division p. -100 2. i. True ii. False iii. True iv. False v. True vi. True vii. True viii. True ix. False x. True 3. a. 9 b. -2 4. 2500 5. i. -11 ii. 7 iii. 6 iv. -4 v. -34 vi. 18 6. a. 11 b. -2 c. 14 d. -28 e. -100 f. 1000 link to this page by copying the following text
